

SUPERVISED 900MHz Wireless
FAL-900 FALL ALERT SYSTEM
LONG RANGE FALL PREVENTION

Wireless
FAL-300 FALL ALERT SYSTEM
STANDARD RANGE! Fall Prevention Systems

GETS HELP FAST!

Long Range!
Up to 1000 feet indoors...
nearly 1 mile open air

Monitors up to 10 Residents/Patients

Now... Advanced **Wireless** technology provides Fall Prevention and Protection *without the need of physical restraints!*

Sensor Pads detect patient's **Attempt** to exit, sends the signal to Sound the Alarm Strobe and **Get Help Fast!**

ALL ECP 900MHz wireless receivers have the capability to supervise all ECP universal transmitters. They also have the ability to pickup low battery warning signals from these transmitters. Every 60 seconds the transmitter sends an 'I'm here' signal to the receiver. If not sensed by the receiver in a thirty minute period the alarm will sound. This means protection from low power, non-working transmitters or transmitters removed from the facility.

GETS HELP FAST!

Standard Range!

with Advanced S.A.W. Technology

Monitors up to 40 Residents/Patients

Now... Advanced **Wireless** technology provides Fall Prevention and Protection *without the need of physical restraints!*

Sensor Pads detect patient's **Attempt** to exit, sends the signal to the Enunciator to **Get Help Fast!**
